

# Beebe River to Whitefield (X178) Line Rebuild Project

This transmission line is 49 miles long and is located between the Beebe River Substation in Campton and the Whitefield Substation in Whitefield, N.H. In total, 579 transmission structures will be replaced, new conductor (power line) and fiber optic cable, known as Optical Ground Wire (OPGW), will be installed the length of the line. The project also includes replacing poles along the Streeter Pond Tap, a 225-foot-long power line that connects the U199 transmission line to the X178 line in Sugar Hill.

Please join us to discuss this project at one of the below Information Sessions where project team members will be available to provide information and answer any questions.

## Wednesday, September 11, 2024

Drop in between 4:30 – 7:00 p.m.

Campton Town Municipal Bldg  
12 Gearty Way, Campton NH

## Thursday, September 12, 2024

Drop in between 4:30 – 7:00 p.m.

Profile School  
691 Profile Rd, Bethlehem NH

# Community Information Session

Beebe River to Whitefield (X178) Line Rebuild Project

EVERSOURCE

## You are invited!

As part of our ongoing investments to deliver reliable energy to our customers and communities, Eversource is proposing to replace existing transmission structures in Campton, Thornton, Woodstock, Lincoln, Easton, Sugar Hill, Bethlehem, Dalton, and Whitefield, N.H. This work will be taking place within the existing right-of-way (power line corridor) of the X178 Line, a 115kV transmission line.

We'd like to invite you to an upcoming series of Information Sessions to brief you on this project and answer any questions you may have.

More information can also be found at [www.eversource.com/X178-Line-Project](http://www.eversource.com/X178-Line-Project)
